COMMENTS FROM THE TOWN MANAGER'S OFFICE

A public hearing will be held at Odeon Hall on Aug. 30th at 8:00 p. m. to discuss the proposed change in the Zoning Ordinace covering the area between the railroad overhead bridge and the Androscoggin River Bridge. Currently there is an area 200 feet in width on each side of U.S. 2 between the bridges that is zoned residustrial to the east and west of the 200 foot strip.

Tax bills are currently being prepared and should be in the mail about Sept. 1st. Until the assessment book is typed, add-The success of this appeal ed and verified the final fig-to the town residents indicates ures will not be available. Howto visit Mr. and Mrs. Dan encouraging to the Trustees.

The final amount will be announced later as well as information, and Miss Alta Smith, mation regarding the repairs is to \$6,313,579. On the basis Auburn, spent the week end and library equipment to be of this valuation and the appropriations at the appropriations are the assessed valuation of \$217,581 over 1960. ### SONIC BOOM

The sanic boom can be desscribed as an explosion-like However at Mach numbers sound heard when a shock above 1:5 the weather condiwave, generated by an aircraft tions would rarely be extreme flying at supersonic speed, reaches the ear. An aircraft boom. Cool, calm weather con-moving through the air at a ditions are generally conceded speed exceeding that of sound Kenerates pressure waves, call-

also see that there are two air operations. principal pressure cones, one originating at the nose of the structural damage did occur, plane called the bow wave, and one at the rear of the plane supersonically at an altitude of bands with illusion face veils. Miss Mackay carried a colonial bouquet of deep pink carna-tions and baby's breath. The

waves are continuously generated, just as the boat moving through the water, and stay attached to the plane until speed bridesmaids carried colonial bouquets of light pink carna-tions and baby's breath, is reduced below that of sound. Although supersonic speeds are not normally attained until above 30,000 feet, it is nevertheless, characteristic of the pressure waves to travel in listance far enough to reach the ground, even from straight and level flight at high alti-tudes. Simply stated, as long as a plane maintains supersonic speed a sonic boom is con-tinuously dragged along the flight path.

The width of the path along which the sonic boom will be heard may vary from a few miles to 50 miles or more, de-

Following a short visit to the Maine Coast the couple are at 1315 Commonwealth Avenue. or role in affecting the sonic boom intensity above Mach numbers 1.0 and 1.5, speed and weather effects combine to cause large variations in the Gerald Harrington has gone sonic boom intensity at ground to Ketchum to work on the Allevel. Because of the combined effects of temperature and wind gradients, an aircraft may \*\*\*\*\*\*\*\*

HUTCHINS **Jewelers** NORWAY, MAINE

sometimes be able to fly at points cause unequal atress Mach numbers up to 1.5 withcontinued from last week out causing any sonic boom disturbances on the ground. However at Mach numbers enough to eliminate the sonic ditions are generally conceded to be the most favorable for sonic boom propagation.

cd shock waves, which have pressure characteristics similar to those of blast waves.

If we could visually observe the waves, we would see that the waves, which have propagation.

Naturally, most people are quite concerned about damage that can be inflicted upon their houses and places of business by the sonic boom. Scientists they are very similar to those and engineers observing the created by a boat as it moves effect of shock waves generatthrough the water. But unlike ed by atomic explosions have through the water. But unlike ed by atomic explosions have the flat surface of the water, never observed structural damthe air through which the age to even the fimstest of test plane is moving is a three-dim-ensional medium. As a result, than 70 pounds per square the waves attain the shape of foot. This is considerably a large cone, extending out-greater than the pressure norward and rearward from the mally observed from a sonic plane. The angle of the cone boom. We can therefore condepends upon aircraft speed clude that structural damage and the speed of sound in the surrounding medium. We would highly unlikely during routine

An incident of superficial called the tail wave.

As long as the plane is exling. This is not a routine opceeding the speed of sound, eration.

Tests which have shown that structural damge is highly improbable have also shown that the sonic boom is capable of cracking plaster and shattering window panes. A great deal has been heard about plaster cracks being caused by sonic booms. Experience has shown that 90 per cent of the time the crack in wall and ceiling plaster believed attributable to sonic booms are in actual fact, old cracks that have been there for some time.

Unfortunately, window glass 2 is not in the same category. Glass is in one sense a strong material; however, it is relatively brittle compared to other building materials when used in thin sheets. The method by miles to 50 miles or more, depending on the altitude, size and speed of the airplane, the temperature, wind. humidity, terrain and other factors.

Aircraft Mach number is an interesting factor. (Mach 1 is a speed equal to that of sound.) Mach 1.5 is a speed one-half greater than the speed of sound.) The speed of the aircraft seems to play only a minor role in affecting the sonic

degree from Eastern Oregon IPTON

Math-Science at West Paris ligh School will be taught by Roland Wilkins, A graduate of Wilton Academy he received his B. S. degree from the University of Maine. From 1959-61 he taught Math and Social Studies at Canton High School.

Ruth Curtis will teach grades four-eight at the Branch School, Newry. A resident of Bethel, she has studied at Gor-ham and Farmington State Teachers Colleges following graduation from Gould Academy. During the past two years she has taught at the Poplar Grade School, Milton, which was closed in June.
At a meeting of the Bethel

School Committee held at the Crescent Park School Monday evening, it was voted to adopt a policy of scheduled monthmeetings during the coming school year. The committee will meet at CPS the second Monday of every month com-mencing September 11. This policy will allow interested citizens to plan to attend school committee meetings. Plans to obtain approval for

the purchase of science equipment were also endorsed. Under this plan, application will be made by the Bethel schools for payment of 50% of the cost of the equipment by the Federal Government under the provisions of the National Defense Education Act. Equipment purchased would be used in the eighth grade science pro-
